Thank you for your support of Baystate Health

A donation to Baystate Health Foundation is a gift to your community. Baystate Health serves individuals of all ages, from adults to babies, in multiple towns, cities, and neighborhoods throughout the region. Chances are, someone you know has been a Baystate Health patient. We’re asking you to consider a gift to your community’s health system. Your donation could help to support the programs, technology, equipment, research, and services that your family, friends, and neighbors rely on when they’re not well.

The Catalog of Joy gives you a glimpse of some of the items that a gift like yours could support and how it can help advance care and enhance the lives of our patients and families. Funds raised through the Catalog of Joy will be utilized where they are needed most throughout Baystate Health, so you can be sure that your contribution is making a real impact year-round.

We thank you for your past support and hope you’ll consider a gift to Baystate Health this year!

Your gift can help in hundreds of ways. This catalog includes examples of how your donation may be used.
1. **NURSERY CAMERAS**

$2,500

Nursery cameras in the Davis Neonatal Intensive Care Unit (NICU) at Baystate Children’s Hospital allow parents to view their babies in real time even when they cannot be with them at the hospital. Baystate Children’s Hospital hopes to expand this service to the other extended-stay nurseries.

2. **RECLINING SLEEP CHAIR**

$2,000

Being able to spend time with a loved one can create special memories that individuals will cherish for years to come. The Acute Care for Elders Program offers reclining sleep chairs to family members and friends so they can spend more time in the room with patients and not miss a moment.
3. **CANCER-RELATED EDUCATION AND RESEARCH SUPPORT**

$1,000

Cancer treatment and diagnosis is a continually evolving field. In order to keep our medical professionals current on the latest trends, education is critical. Additionally, research support is crucial to continue innovating and working toward better treatments, positive prognoses and a cure.

4. **SPECIALIZED TABLET**

$250

Today, tablets are used to teach heart and vascular patients self-care techniques at their own pace before being discharged from the hospital. Educating patients allows them to confidently make informed health choices at home and minimizes their chances of relapse or readmission.
5. **INFANT CAR SEAT**

$100

Wesson Women & Infants’ Unit at Baystate Medical Center provides car seats to families who cannot afford them. This ensures that every baby leaves the hospital safely.

6. **TOYS**

$50

For children at the Baystate Children’s Hospital, toys and games help them process their emotions, bringing a sense of joy during what is often a stressful time.
7. **GAMES AND ACTIVITIES**

$25

One goal of the Acute Care for Elders Program is to help keep patient minds sharp and active. Social activity facilitates a quicker return to their homes and independent lives.

**WAYS TO GIVE**

- Enclose your gift in the attached envelope
- Make your gift online at [BaystateHealth.org/Giving](http://BaystateHealth.org/Giving)
- For questions or to donate over the phone, call 413-794-5444

---

*Please note that due to infection control standards, we cannot accept physical items of any kind.*
“I worked at Baystate Health for six years before I had Shane and didn’t realize how valuable it was to have Baystate Children’s Hospital and the Davis NICU so close to home until we needed it. Now, I can’t imagine what our experience would have been like without it.”

- Jessica Perry, Shane’s Mom

Your shopping can support Baystate Health

AmazonSmile donates .5% of all purchases to Baystate Health when you select Baystate Health Foundation as your supported charity at Smile.Amazon.com. Use your regular Amazon login information and see the donations add up.
