

Precocious Puberty Referral Guidelines

Girl with breast development after age 2 or before age 8, or boy with testicular enlargement before age 9

Do pre-referral screening:
Bone Age Xray
Early AM LH* + FSH +
Estradiol sensitive (girls) or Testosterone Free equilibrium/Total LCMS (boys)

REFER:
If rapid GV (> 8cm/yr annualized) and/or labs abnormal (BA advanced more than 2 SD, LH > 0.3 ** mIU/ml, Total T > 20 ng/dl, estradiol > 2 ng/dl)

MONITOR:
Normal labs and bone age within 2 SD
Examine every 4 months
If rapid tempo of changes, repeat labs and **REFER**
