Audience:
All providers who care for obstetric patients and newborns, including obstetricians, pediatrics, nurse midwives, nurses, nurse practitioners, physician assistants, physicians, and social workers.

Goal:
The goal of this program is to provide optimal care for pregnant patients with substance use disorders.

Learner Objectives:
By participating in this program, you should be able to:

• Discuss the different presentations for patients with Substance use disorders (SUD)
• Discuss the neurobiology of substance use and addiction applicable to care of pregnant women
• Describe practical screening methods for substance use in your practice
• Discuss the legal implications of a positive screen for outpatients/inpatients
• Discuss the medication options for substance use disorders (SUD) in pregnancy (medication assisted treatment (MAT))
• Discuss considerations for developing a plan of care based on your patient’s historical and current substance use
• Explain how to access resources for the pregnant women experiencing SUD
• Explain how to management acute withdrawal in pregnancy and inpatient medication options
• Discuss pain management during labor, delivery, post-op and post-partum for the patient with SUD
• Describe optimal pain control options following discharge
• Discuss the current research on infants of breastfeeding mothers on medication assisted treatment (MAT)
• Describe an evidence based approach to the care of infant experiencing neonatal abstinence syndrome
• Explain the role of the Department of Children and Families in caring for infants born to mothers with SUD
